Sen. Mark Kelly (D-AZ) - Palantir & AWS Trades

Sen. Mark Kelly (Senate Armed Services and Intelligence Committees) has multiple Periodic Transaction Reports showing family trades in Palantir (PLTR) and Amazon (AWS). Palantir builds ICE's targeting platforms; AWS hosts ICE biometric and RAVEN systems. Kelly's committee assignments give him non-public information on DHS/ICE budgets and contracts. STOCK Act disclosures show timed trades aligning with major ICE contract announcements. High conflict of interest. Source: Senate financial disclosure database and Quiver Quantitative tracking (2021-2025).
